

The Cabin — Turnover Guide

v1.0.0 · updated 2026-09-24

Before you start

1 ☐ Know the window

1. Unless Ben says otherwise, you can start at 11am.
2. The next guest won't arrive before 2pm, but count on them arriving AT 2pm — everything must be done by then.
3. Turnover days and times are on the calendar Ben shares with you.

2 ☐ Ask if anything is unclear

1. Don't be afraid to ask questions. Text Ben any time — 908-566-7635.

Get in

3 ☐ Open the building's front door

Schematic of the Ultraloq U-Bolt keypad, not to scale — drawn by Claude from Ben's description, not a product image.

1. The lock is a keypad lock with a key slot in the front (an Ultraloq U-Bolt).
2. Enter the code, then press the bean-shaped button at the BOTTOM of the keypad. That button is what actually unlocks the door — it's the part people miss.
3. The apartment door has the same kind of lock and works the same way.

4 ☐ Find the apartment

1. The apartment is the FIRST DOOR ON THE RIGHT — the first door you reach.
2. Enter the code, press the bean-shaped button at the bottom.

5 ☐ Find the guest room

1. Inside the apartment, the guest room is the door immediately to your LEFT.
2. The lantern outside the room's door should be lit RED.
3. Open the bolt lock on the door (the Level lock). It has to be open to get into the room.

If the lantern is NOT lit red: tell Ben.

6 ☐ Check the screen on the door

1. The small screen on the door shows a low-battery indicator in its BOTTOM RIGHT corner when it needs charging.

If it shows low battery: take the screen off the door, plug it into the USB-C charger on the nightstand inside the room, let it charge for the whole turnover (longer if you can), and put it back on the door before you leave.

First look

7 ☐ Turn all the lights on

1. Use the remote on the wall just to the right of the door — press the yellow power button.
2. Every lamp in the room should light up. A lamp that stays dark has been switched off at the lamp or unplugged — switch it back on / plug it in.
3. All lamps must be left powered ON. The lights are controlled remotely, and a lamp switched off at the lamp can't be controlled.

8 ☐ Check the speaker

1. Say "Computer, are you here?"

If there is no response: press the unmute button on top of the speaker and try again.

If it says it's having trouble connecting: tell Ben.

9 ☐ Collect anything used

1. Used mugs, bowls, wine glasses, the French press, coffee things — anything on any surface — go to the kitchen sink.
2. Also check beside the kitchen sink for anything the guest already brought out of the room.
3. Throw away trash left on surfaces.
4. If the projector was left on, turn it off.

10 ☐ Clean the mini fridge

1. Guests are told to leave the fridge EMPTY and OPEN at checkout (it switches off at checkout and defrosts).
2. Take out anything left inside.
3. There's a defrost dish inside (pictured). Check it for water — it shouldn't have any, but sometimes it's full. If it is: stuff a bunch of paper towels in to soak up the water first, then pull the dish out and empty it. Pulled out full, it spills.
4. Wipe the inside with the bleach spray cleaner from behind the toilet and paper towels.
5. Close the fridge once it's clean.

If the fridge was NOT left open: tell Ben (the guest was asked to leave it open).

Strip the bed

11 ☐ Look for new stains before you strip

1. Check sheets, pillowcases, duvet cover and pillows. What counts: a big NEW bleach stain (small old ones exist — a large one is probably new) · a food stain · a body / oil stain · hair-product stains on the pillows.

If you find one: take a photo and send it to Ben.

12 ☐ Strip the sheets and pillowcases

1. Sheets and pillowcases go in the laundry bag (see "Laundry" at the end for where it is).
2. Throw pillows are NOT stripped or replaced — they get lint-rolled later.

If a WHITE pillowcase is on over another pillowcase: the guest opted into a bleaching skin product. The white one goes to laundry; the case underneath is clean — leave it on.

13 ☐ Decide about the duvet COVER

1. This is about the duvet COVER, not the duvet itself.
2. Normally the cover stays on — lint-roll it.
3. Replace it only for a fresh food or bodily stain, or if it smells off.
4. Some covers have bleached spots. Keep them facing down; if one ends up on top, cover it with the runner blanket.

If you changed the duvet cover: tell Ben — he tracks how many are clean so laundry gets timed right.

Supplies under the bed

14 ☐ Find what you need under the bed

1. Three BIG containers, side by side: duvet covers · towels · sheets.
2. Three SMALL containers, one in front of each big one: hand towels + washcloths (in front of towels) · pillowcases (in front of sheets) · cleaning kit (in front of duvet covers).
3. A sheet set is a fitted sheet and a flat sheet.

15 ☐ The cleaning kit

1. Sticky lint roller (the most effective one) · lint-rolling glove · all-purpose cleaner · a spray bottle of water + a toothbrush for spot cleaning · chocolates for the bed.

Make the bed

16 ☐ Fresh sheets

1. Fresh fitted sheet and flat sheet from the sheets container.
2. The runner blanket goes across the foot of the bed, covering the bottom two-thirds, as pictured.

17 ☐ Pillows

1. Three sleeping pillows, each with a fresh pillowcase, at the headboard.
2. Two square throw pillows in front of them, lint-rolled and arranged as pictured.
3. Spot-clean any marks on the throw pillows with the toothbrush + water from the kit.
4. The bed-care note on the headboard stays where it is.
5. Put a chocolate on the center pillow from the supply box if the old one was eaten; otherwise put the old one back.

18 ☐ Hammock chair

1. Two canvas pillows on the bottom (to sit on), the round throw pillow at the back, the throw blanket folded as pictured. Guests move the blanket around.

19 ☐ Push the containers back

1. Push the under-bed containers all the way back so they can't be seen from the door.

Window wall

20 ☐ Set the window wall

1. Curtains open and tucked behind the boat cleats.
2. Air conditioner powered OFF. (Unlocking the door turns its outlet on, so if the unit itself is on it will start — turn it off anyway.)
3. The lamp to the left of the window powered ON.

21 ☐ Remotes

1. The two remotes (projector + Apple TV) sit on the wooden dish on the left shelf.

If a remote is missing: it has fallen between the bed and the wall, or it's on the nightstand — those are the two usual places.

22 ☐ Coffee and tea station

1. Three mugs hanging on their hooks.
2. Kettle emptied of water.
3. French press present and clean.

If a mug is missing: check around the kitchen sink; wash it and hang it back.

If the French press is missing: it's probably in the kitchen — clean it and put it back.

Nightstand

23 ☐ Set the nightstand

1. Noise machine on the "meadow" setting at a reasonable volume.
2. The accordion lamp on, aimed over the nightstand.
3. Charging cable draped over the top of the charging station.

If the noise machine is on but silent: power it off and on again.

Desk wall

24 ☐ Set the desk

1. Wipe the desk with a damp paper towel and the all-purpose cleaner from the cleaning kit. The desk is wood — never bleach.
2. Make sure that:
3. the bin under the desk is empty, with no bag in it (guests use it as a hamper, sometimes for recycling);
4. the desk lamp is on and aimed as pictured — guests bend it and knock the shade off, so put the shade back on;
5. the recommendations book (the other-colored guide) is next to the lamp, as pictured;
6. the water pitcher is empty;
7. the draft stopper is hanging behind the door.

Door wall and check-in shelf

25 ☐ Towels on the ladder

1. Two bath towels, one dark washcloth, one light washcloth, arranged as pictured.
2. Some guests never use their towels — if a towel is dry and looks unused, leave it.
Look at the washcloths more closely.
3. Fresh ones come from the towels container and the hand-towel container under the bed.

26 ☐ Check-in shelf

1. Two wine glasses hanging under the shelf, two mugs on their hooks. If used, they're by the kitchen sink — wash and hang them back.
2. Rinse the toothbrush cup.
3. The guidebook goes in front of the check-in / check-out buttons, as pictured. Guests move it to the nightstand or the desk.
4. Both guides in place — the guidebook here, the recommendations book by the desk lamp.
5. Anything a guest left in the hanging tote of bathroom / shower products goes back to the closet shelf (see "Closet").

27 ☐ Air purifier and snacks

1. Air purifier ON, level 2.
2. Biscotti and Ricolás — if a jar is more than half empty, refill it. Refills are in the cast-iron cooker on Ben's stovetop.

Closet

28 ☐ Bath products

1. Products arranged neatly on the shelf as pictured. Bring back anything the guest left in the bathroom or in the hanging tote.

If a bottle feels completely empty: throw it out and replace it with the full one of the same kind from behind it in the closet.

29 ☐ The rest of the closet

1. Hair dryer hanging in its holster on the left inside wall of the closet (pictured, left).
2. On top of the fridge: at least two of each — 2 plates, 2 bowls, 2 of each utensil — in the rack.

30 ☐ Makeup wipes

1. The makeup wipes (facial towels) live in the mesh side pocket of the hanging organizer in the closet, as pictured. Make sure there are some.

Bathroom

31 ☐ Clean the bathroom

1. Products left on the bathroom window shelf or on the sink are probably the guest's — clear them. Anything from the room's closet goes back to the closet shelf.
2. Collect any clothing left behind.
3. Hair off the shower wall and out of the sink.
4. Toothpaste off the mirror and around it; wipe the sink.
5. Brush the toilet once over — the brush is next to the toilet.
6. Scrub the shower if it needs it.

32 ☐ Toilet paper, soap, trash

1. Toilet paper on the holder AND a backup roll present. Backup rolls are on the high shelf directly across from the toilet — never buy.
2. Hand soap dispenser full. Refill is under the sink, in the black bag — squeeze it into the dispenser.

If the bathroom trash is fairly full: empty it; new bags are under the current bag.

Finish

33 ☐ Quick vacuum

1. The vacuum stick is in the kitchen. Its charging base is on the tool wall in the basement.
2. Carpet attachment on the rugs.
3. Get obvious crumbs on the desk, the nightstand, and in or around the fridge.

34 ☐ Trash out

1. Empty the room's trash basket. The roll of new bags is in the bin, under the current bag (inside the room, not outside).
2. Take the bags out to the front gated area of the building.

35 ☐ Last look

1. Every lamp on. Curtains open. Remotes on the dish. Both guides in place. Purifier on. Fridge closed. Containers pushed back.
2. Take a photo of the finished room and send it to Ben.

36 ☐ Lock up and mark it done

1. Put the door screen back on the door if you had it charging.
2. Lock the bolt.
3. Press the turnover button on the right, just outside the door, ONCE. That tells Ben the turnover is done.
4. If you pressed it by mistake, a double press undoes it.

Laundry

37 ☐ Where the laundry bag is

1. There is one laundry bag: a black laundry backpack. It's in one of three places, in this order:
2. in the kitchen;
3. if not, in the hallway leading to Ben's apartment;
4. if not, at the end of the hall to the left, through the door with the number-code lock (code 2880), hanging on the wall.
5. Between turnovers, keep the bag in the hallway — unless it started behind the coded door, in which case keep it there.

38 ☐ When laundry needs to go out

1. Send the laundry out when ANY of these is true: the laundry bag is nearly full · only two sheet sets are left · only three towels are left.
2. Bring the full bag into Ben's hallway and lean it against the wall near the mail. Text Ben — he schedules the pickup.
3. The laundry comes back in the same bag, folded, a few days later. Put everything back in the right containers under the bed.

Plants (only if Ben asked you)

39 ☐ Water the plants

1. Not every turnover includes this — only if Ben asked you.
2. Use the electric plant waterer Ben showed you.
3. Plants that are just jars of water: fill them nearly to the rim.
4. Large plants: water for 25 seconds, moving slowly around the plant as you go.
5. Small plants: 8 seconds.
6. Don't stand on the wicker chair — use the folding step stool (by the robe hook).
7. Send Ben a photo of the plants so he can see how they look.
